

Accu-Tite™ sanitary clamp torque tools are designed to consistently tighten hygienic clamps, enhancing connection reliability and reducing ergonomic issues associated with hand tightening. Hand-tightened connections can lead to potential leaks or over-tightening, which can compromise process integrity.

Accu-Tite™ tools standardize clamp tightness, minimizing these issues. The tools accommodate most hygienic clamp wing nuts and come in various styles, including knob, TD series with a slip-clutch mechanism to prevent over-tightening, and TDR series with a compact design and audible “click” at preset torque.

TD KNOB STYLE SERIES (Slip clutch)

Part Number	Description
TD-30INLB-B	Blue Dial, set to 30 IN-LB
TD-40INLB-N	Green Dial, set to 40 IN-LB
TD-50INLB-R	Red Dial, set to 50 IN-LB

TDR RATCHET STYLE SERIES (Audible click)

Part Number	Description
TDR-30INLB	Set to 30 IN-LB
TDR-40INLB	Set to 40 IN-LB
TDR-50INLB	Set to 50 IN-LB

**Contact int2 for other torque settings or configurations*

FEATURES & BENEFITS

- Slip clutch or audible click torque mechanism
- Torque settings of 30-60 INLB +/-4%
- Ergonomic knob or ratchet style design
- Universal clamp socket
- Supplied factory calibrated with supporting documentation
