

Why get charged for sterile cleanroom assemblies when all you need is a quick, non-sterile solution?

Int2 Solutions eliminates the 'MOQ Tax.' We transform industrial-scale bulk inventory into precision-packed, small-quantity kits allowing you to stop over-ordering and start optimizing your capital.

Typical applications include:

- Proof of concept designs
- R&D bioreactor additional lines
- Pilot plant assemblies

Attributes & Advantages

- Flexible pack quantity options
- Fully agnostic component integration
- Packaged in a controlled environment
- ISO 9001:2015 certified facility
- Available unprocessed, irradiated or autoclaved

*Whether it's a proof of concept,
prototype, or at scale...
Let int2 Connect You!*

Custom Kitting

Fully configured single-use component kits that reduce assembly time, streamline procurement, and accelerate production readiness.

Single-Use Assemblies

Standard designs for sampling assemblies and the option for customization based on your specific process requirements.

Single Use Components

Wide range of components from nearly every manufacturer:

- Carolina Components Group
- Eldon James
- Nordson
- CPC Biotech
- And Many More...

Tubing

Nearly all silicone, TPE and specialty tubing brands and styles available:

- Carolina Components Group
- AdvantaPure
- Saint Gobain
- Watson Marlow
- Gore
