

Hose Labeling System

Identification and traceability are of critical importance to the pharmaceutical and biopharmaceutical industry. To address this need for hose assemblies, the CLEAR-mark hose labeling system was created.

CLEAR-mark labels are molded directly onto any silicone or silicone covered hose. The resulting label is permanently attached with no crevices or entrapment areas. CLEAR-mark labels are extremely durable and capable of handling repeated autoclave, steam in place (SIP) and clean in place (CIP) cycles.

CLEAR-mark hose labels are available in a variety of colors for product, process or area segregation. Two lines of text are available for customer information with additional lines for the hose part number, manufacture date and serial number.

Features

- Permanently attached to the hose
- No crevices or entrapment areas
- Durable and easy to read
- Autoclavable
- CIP SIP compatible
- No product contact
- Fast turn-around
- Available in a variety of colors
- Two lines of customizable text
- Part number, date and serial number included on every label

Whatever level of traceability is required, int2 Solutions has you covered.

CLEAR-mark, the ultimate solution for hose traceability.

int2 Solutions, LLC Capabilities

int2 Solutions is a fabricating distributor of high purity fluid handling components and only distributes best-in-class products with a strong focus on sales, service and quality for every order.

The cornerstone of the int2 Solutions business is high purity hoses and we take tremendous pride in helping customers select the appropriate hose for each specific application and process. All hoses are fabricated, tested and labeled in our manufacturing location and each hose is delivered with required documentation including certificate of compliance.

The int2 Solutions team has over 100 years of combined experience in the high purity fluid handling space and has created products for our customers that helped solve a gap that had no solution before the existence of the products below.

CLEARMARK® LABELING - provides identification and traceability

HSU HOSE RACKS - eliminate clutter and enhance safety

JO DOLLY - safe and secure way to move carboys

ACCUTITE TORQUE TOOLS - apply consistent /torque to sanitary clamp wingnuts

Let int2 connect you!
