CLEAR-band
Hose Labels

Identification and traceability are of critical importance to the pharmaceutical and biopharmaceutical industries. int2 Solutions CLEAR-band hose labels are molded directly onto any silicone or silicone covered hose. The resulting label is permanently attached with no crevices or entrapment areas.

CLEAR-band labels are extremely durable and capable of handling repeated autoclave, steam in place (SIP), and clean in place (CIP) cycles. Labels are available in a variety of colors for product, process, or area segregation. Included are two lines of text for customer information with additional lines for the hose part number, manufacture date and serial number.

To meet the ever-increasing demands for product identification, CLEAR-band also includes a unique serial number on each assembly. This serial number allows for complete traceability of all aspects of the hose subcomponents and fabrication process.

Whatever level of traceability is required, int2 Solutions has got you covered!

FEATURES & BENEFITS

- Permanently attached to the hose
- No crevices or entrapment areas
- Durable and easy to read
- Autoclavable
- CIP & SIP compatible
- No product contact
- Fast turn-around
- Available in a variety of colors
- Two lines of customizable text
